Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1755

Claims 1, 5, 10, 11 and 13 are under examinations. Claims 2-4, 6-9, 12 and 14-21 are withdrawn from consideration as non-elected. This application contains claims 2-4, 6-9, 12, 14-21 drawn to an invention nonelected with traverse. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 10, 11 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 4737379.

The instant claims are drawn to coatings (construed as a deposited film) comprising compounds of silicon, oxygen and carbon (silicon oxycarbide). Claim 10 limits the coatings to those including more than one layer where at least one layer is said compound. Claim 11 requires that the coating of claim 1 is graded through its thickness. Page 6, line 19 through page 7, line 12; of the specification defines "graded" as having a composition that varies in a continuous or step manner through its thickness.

US Patent 4737379 teaches films comprising SiC_xO_y wherein x and y are from 0 to 2. Column 16, lines 65+ teach that such layer may be deposited upon an underlayer of differing composition. That deposition forms a multilayer film having a composition that varies in a step manner through the thickness of the film.

Column 17, line 19 of the reference discloses F⁻ **may be** [emphasis added] incorporated into the final films. Column 12, lines 21+ teaches addition of a scavenger gas to remove the halogen from the deposited film. The prior art clearly anticipated films both containing and those not containing halogen.

Art Unit: 1755

Applicant's attention is directed to the remaining documents cited by examiner that disclose and claim similar films.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 5, 10, 11 and 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no basis in the specification as filed for the amendment made. The mere absence of a positive limitation is not basis for an exclusion. See *Ex Parte Grasselli*, 231 USPQ 393 and, MPEP 2173.05(j).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
